Hidden mystery games android

Adventure games are one of the most unique of any game. They don't fit into one category or genre and often they will fit into several genres at once. The only real prerequisite for the game to be an adventure game is that it should take you on an adventure. It describes most of the game. However, adventure is not a genre defined by mechanics such as RPGs, first-person shooters, or sandbox games. Thus, adventure games can be anything. We listened to readers' comments for years after writing this one so we hope we find some decent games that will take you on a fictional adventure. If you're ready for a list of games that will do just that, here's our selection for the best adventure games on Android!80 DaysPrice: \$5.9980 Days is one of the better adventure games for Android. You play as Phileas Fogg's assistant, Passepartout, and you try to circumnavigate the world in just 80 days. You can board airplanes, submarines, trains, and even mechanical camels. Players must manage the vital signs of Phileas as you travel the world or risk losing the game. The game plays fast and you're really adventurous all over the world. In addition, you can also use other players to see who gets there first. This is one type of game and is worth the price tag. It's also free via Google Play Pass if you have one. CrashlandsPrice: \$4.99Crashland is already one of the best adventure games of 2016. You play a space truck driver named Flux. The game begins with you crashing into an alien planet. Your job is to take your cargo, build a base, fight the bad guys, and save the world. It has many game elements, including crafts, battles, rpg style character alignment, and you can even tame creatures to fight for your side. It's an immersive game with a lot of content that you can play on your phone and PC. Rating 4.8 on Google Play is accurate. This one is also available on Google Play Pass if you use it. Evoland 2Price: \$7.99Evoland 2 is easily one of the best adventure games in recent memory. It transcends genres by including a large group of them. That includes 2D RPGs, 3D fighters, trading cards, hack-and-slash, and many others. The game basically evolves through different game eras and each new mechanic also brings a new graphic style as well. Its unique game keeps you guessing and it's a fun overall experience. We recommend playing with a physical controller for best results. The game is also constantly on sale so you can most likely pick it up for less than the requested \$7.99. Genshin ImpactPrice: Free to playGenshin is one of the newer adventure games on the list. It's very similar to Zelda: Breath of the Wild. Players get a big, open world to explore with lots of quests and missions to do. Players even get gliders to cross larger distances. There's also a gacha RPG element to this one, but you get most of the characters through searching rather than random calls so it adds a little flavor to the game. It looks good, the controls are excellent, and you'll be venturing through this one for a long time. Grand Mountain AdventurePrice: Free / \$5.49Grand Mountain Adventure is one of the newest adventure games on the list. It is a ski game with elements of racing and exploration. Players take the elevator to various tracks. You then ski the track and try to beat the time requirement. However, you can also just ski and see the sights. There are also hidden areas, five mountains (in the premium version), online leaderboards, and you can even do tricks when you reach the big air. The game's controls and perspective are a little strange at first, but not too difficult. The graphics are also gorgeous and the game is smooth. You get the first mountain for free and you can buy the premium version to unlock the rest. Guardian TalesPrice: Free to playGuardian Tales is a retro-style adventure game with hack-and-slash game mechanics and decent controls. Players roam around the world while solving puzzles and unraveling the mysteries of the game. There are boss fights, decent stories, and some nice little things you can do. It's reminiscent of the older Zelda game but with some city-building mechanics added. There are also social mechanics such as guilds so you can chat with friends as well. The game does rely on some gacha mechanics, and it can be a little annoying for free players. Monument Valley 1 and 2Price: \$3.99 - \$4.99 + \$1.99 each for DLCSquare Enix's Monument Valley 1 and 2 are two of the most popular puzzle adventure games available. You move the levels around because each level is a puzzle. Players are treated with optical illusions, vague but fun stories, and a consistent experience through two games. The first game includes a standard story with DLC (\$1.99). The second game is currently \$4.99. The only complaint we have is the length of the game. The game is a little short. They are still very much a great game, but those who don't like short games may be frustrated with this. They are free via Google Play Pass as well. OddmarPrice: Free / \$4.49Oddmar is a charming adventure platformer from the same developer from Leo's Fortune. You play as a struggling Viking who wants to restore his honor. You venture around the gaming world to do just that. The game has smooth gameplay, excellent controls, and an excellent level design. Plus, it achieves all the extras with hardware controller support, the Google Play Games cloud is saved, and works offline once you've downloaded all the data. The game is a bit short of just 24 levels, but each level has a 3-star rating system to encourage replayability. You get a little game for free before you have to the rest with one purchase in the app \$4.49OPUS seriesPrice: Free / VariesThe Opus game is a series of three adventure games that tell a dark, but touching story. The first is Opus: The Day We Discover the Earth where you play as a robot trying to save humanity by returning to Earth. Following him is Rocket Whispers: Prologue leading to Opus: Rocket of Whispers. The last game tells the story of two plague survivors who want to build a rocket to perform a space burial. The whole series was really good and the execution was one of the best we've ever seen. The game can be a little pricey, but you can start the game for free as a kind of demo before purchasing the full title. Pokemon GoPrice: Free to playPokemon Go is one of the more ambitious adventure games. You actually go into the real world and catch Pokemon, fight in Gyms, plunder Poke Stops, and more. The adventure elements are a little more literal in this game than others. It does require you to go to your own places and play games in those locations. Players roam the open world and catch Pokemon, fight in the gym, fight each other, trade Pokemon, collect various items, and do all kinds of other things. The genre is also growing and you can play similar games to Minecraft: Earth, Harry Potter: Wizards Unite, and Jurassic World Alive.The Room: Old SinsPrice: \$4.99Most of The Room is not an adventure game. The same cannot be said for the latest games in the series, though. The Room: Old Sins combines elements of exploration along with its iconic puzzle structure. It gives him an extra dimension that didn't have a game before. For the unfussy, The Room is a series of games with gorgeous graphics, complex puzzles, and arcane themes. The latest one, One Sins, also supports Google Play Games, cloud saving, and more. This will be one of the best puzzle adventure games of 2018 for sure. Rusty Lake (Cube Escape)Price: Free / VariesCube Escape series is a series of mystery adventure games where you have to solve puzzles to find out what really happened. It's also known as the Rusty Lake story and can actually be played online as a web game as well. The mechanics are quite simple and each game has you solving various puzzles to advance in the story. Technically they are escape games which means most of the time you will solve puzzles. However, this is an excellent series of games. We include it in this list because the Cube Escape series is almost entirely free without in-app purchases, making it the best at that price point. There are some premium games by developers as well which are really good. Sky: Children of the LightPrice: Free to play Sky: Children of Light is a fun adventure game with decent graphics and fun stories. There are seven worlds to explore and there is even a social element where you can talk to other players. Other game features include cooperative play, various character customizations, various trials to keep things fresh, and above average. The social element is the main attraction here and being able to explore the world with people is a nice touch. Square EnixPrice: Free / VariesSquare Enix can pen one heck of a narrative and its storytelling is one of the best in Game. Thus, most of their mobile games make an excellent adventure game. Some examples include Adventures of Mana, Secret of Mana, Life is Strange, Final Fantasy: Brave Exvius, various Dragon Quest games, The World Ends With You, Final Fantasy XV: Pocket Edition, and more. The games cover several genres, including RPG, puzzle, slice of life, and hack-and-slash. For some reason, half of Square Enix's libraries are under different developer names than others. We have one linked to all Final Fantasy games and the old RPG mobile port. You should probably search for Tomb Raider and Life is Strange stuff on Google Play. After all, the Square Enix catalog doesn't have a short game, really, so be prepared to tie up and play a while. WitchSpring4Price: \$4.99WitchSpring is an adventure game that probably should be more popular than this game. You play as a Wizard who is also the ruler of the entire continent. Players explore the world, meet different characters, and do things. This is a surprisingly charming RPG from a much larger developer in Korea than in any other part of the world. There are actually four games in this series. The first two tell the same story but from different perspectives while the third and fourth games are independent entrants that you can play without the need to play the other. Games range from \$1.99 to \$4.99 each and they're all pretty good. If we missed one of the best adventure games for Android, let us know about them in the comments!
